ENHANCING DELTA TABLES WITH CUSTOM METADATA LOGGING

Learn how to leverage Delta Lake custom metadata for better data lineage, governance, and pipeline observability. Includes practical examples and best practices.

ENHANCING DELTA TABLES WITH CUSTOM METADATA LOGGING

```
# Using SparkConf
spark.conf.set(
    "spark.databricks.delta.commitInfo.userMetadata",
    "Global session metadata - Data processed by ETL pipeline v2.1"
)
```

Learn how to leverage Delta Lake custom metadata for better data lineage, governance, and pipeline observability. Includes practical examples and best practices.

Learn how to enrich your Delta tables with custom metadata for better data lineage and governance Implement metadata logging at both session and individual write operation levels Explore practical use cases for leveraging custom metadata in data pipelines
